

复旦大学数学科学学院 数学综合报告会

报告题目: On Morrey and Campanato spaces

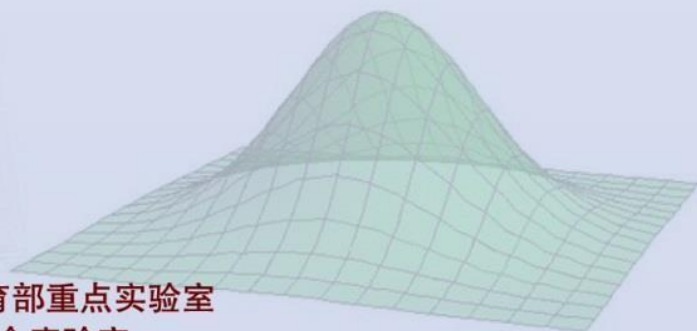

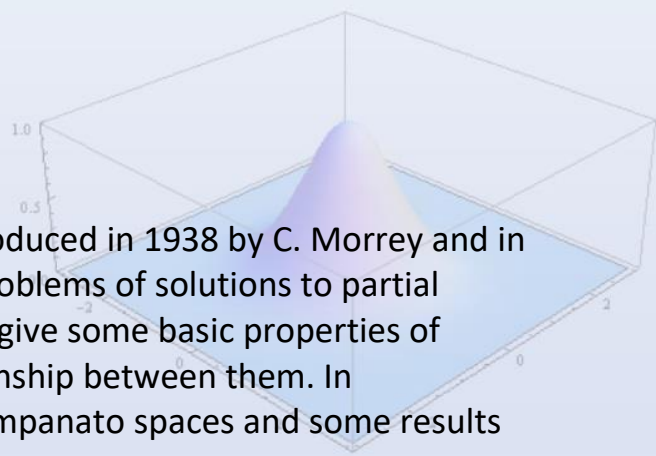

报告人: 乌兰哈斯教授 (汕头大学)

时间: 2022-05-25 星期三 15:00 - 16:00

地点: 腾讯会议: 911-145-613

报告摘要:

Morrey spaces and Campanato spaces were introduced in 1938 by C. Morrey and in 1963 by S. Campanato in relation to regularity problems of solutions to partial differential equations, respectively. This talk will give some basic properties of Morrey and Campanato spaces and some relationship between them. In particular, we mention analytic Morrey and Campanato spaces and some results based on the interests of the speaker.
