

复旦大学数学科学学院 数学综合报告会

报告题目: Positive Livsic theorem for random Anosov systems

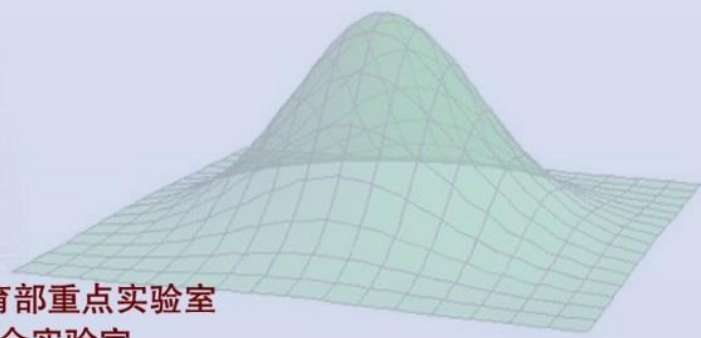

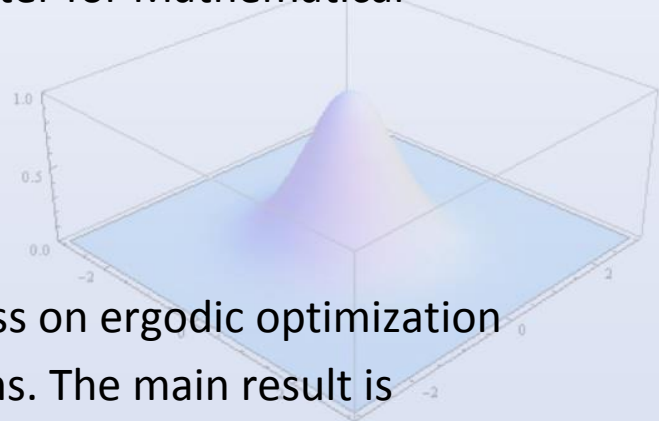

报告人: Professor Zeng Lian (Sichuan University)

时间: 2021-04-15 星期四 15:00-16:00

地点: Room 110-112, Shanghai Center for Mathematical Sciences

报告摘要:

In this talk, I will report some progress on ergodic optimization theory for random hyperbolic systems. The main result is called the positive Livsic theorem, Revelation theorem, Mane's lemma, and some other names. This work is joint with Kening lu and Wen Huang.
