

## **GENERALISED PAIRS WITH LOG ABUNDANT DATA**

**Speaker: Zhengyu Hu**  
**Chongqing University of Technology**

**Time: Wed, Mar. 24th, 14:00-15:00**

**Venue: Room 102, Shanghai Center for Mathematical Sciences**

**Abstract:** The talk contains two part. In the first part, I will discuss a canonical bundle formula for log canonical pairs, from which generalised pairs with log abundant data appear naturally. In the second part, I will discuss abundance theorems for generalised pairs with log abundant data.
